Phoenix, AZ 📌

Software engineer with a focus in *web development*. Seven+ years of experience designing and developing complex user interfaces, API's, and back end systems. Looking for a modern workforce that I can *meaningfully contribute* to, while being challenged with new ideas, technologies, and methodologies.

Skills

Front End

HTML, (S)CSS, Bootstrap. JavaScript, React, Vue.js, Knockout. NPM, Webpack, Lint, Babel.

Back End

C#, .NET & Core, xUnit, NUnit. LINQ, EF, Sql Server. Swagger, SignalR.

Source Control

Git, TFVC.

DevOps

Azure(Build/Deploy pipelines).

Tools

Visual Studio 19, VS Code, SSMS. Postman, WCFStorm.

Process

Azure DevOps, Agile/Scrum, TTD, CI/CD.

Strengths

- ❖ Full stack, innovative, self-directed software engineer with a proven history of developing interactive and responsive web applications, services, and APIs.
- ❖ Advanced education and continual research of web application practices and conventions, consistently integrating new technologies and tools.
- ❖ Known for writing clean and consistent code that is maintainable and testable.
- ❖ Thrives in a modern agile environment with regular exposure to emerging technologies and methodologies.
- ❖ Works well independently or in a team setting, drawing on excellent interpersonal skills to drive project objectives and ensure team success.

Experience

Senior Software Developer (WebSelfStorage)

U-Haul | *Phoenix, AZ*   *2017 - 2020*

- Lead a CMS implementation initiative, offering affiliate customers to expose their own facility website.
    - .Net Core & Vue/React.
    - Cofoundry framework.
    - Azure Build & Release pipelines.
- Contributed to U-Haul's largest SaaS product, WebSelfStorage.
    - Agile/Scrum methodology.
    - Close interaction with product owners and stakeholders.
    - Advanced through several internal teams.
- Completed and enhanced Quickbooks & Sage50 interface integration.
- Developed and deployed a suite(~12) of REST API's in tandem with an external kiosk team, used for integration in the physical facility kiosks.
- Enhanced and maintained existing internal SOAP services(~15) utilized by other U-Haul teams.

Education

B.S. Network Security

University of Advancing Technology
Tempe, AZ   *2013*
